ORCID: 0000-0001-9144-1722
Google Scholar: Verónica Gutman
ResearchGate: Verónica Gutman

PROFESSIONAL PROFILE

Ph.D., M.A., and B.A. in Economics specialized in Environmental Economics, Climate Change, and Sustainable Development.

More than 20 years of experience in research, technical assistance, and consultancy on climate finance, climate policy, climate finance tracking and measurement, climate budget tagging and taxonomies, climate adaptation and resilience, carbon pricing, carbon markets, trade and environment and low-emission development strategies.

Extensive experience working with multilateral organizations and international cooperation agencies, including the IDB, World Bank, CAF, ECLAC, UNDP, UNEP, CABEI, IDRC, and IKI, as well as with governments across Latin America. Work has included the design and evaluation of economic and financial instruments, climate finance strategies, decarbonization pathways, regulatory frameworks for carbon markets, and the preparation of funding proposals for international climate funds, including the GCF, GEF, and NAMA Facility.

Coordinator of the Carbon Tax Component of Argentina's Partnership for Market Readiness (PMR) Project implemented with the World Bank.

Researcher at the Interdisciplinary Institute of Political Economy of the University of Buenos Aires (IIEP-UBA CONICET).

Associate Professor of Environmental Economics at the University of Buenos Aires and postgraduate lecturer in the Master's Program in Climate Change Law and Economics at FLACSO Argentina.

Author and co-author of several publications on Environmental and Climate Change Economics.

ACADEMIC BACKGROUND

Doctorate

- *Ph.D. in Economics*, University of Buenos Aires, Argentina. Thesis: "Climate Change, Sustainable Development, and Mitigation Incentives in Latin America" (01/03/2009-04/03/2015)

Master's Degree

- *M.A. in Economics*, University of Buenos Aires, Argentina. Thesis: "Climate Change and Carbon Markets" (01/03/2004 – 28/09/2007)

Bachelor's Degree

- *B.A. in Economics*, University of Buenos Aires, Argentina (01/03/1997 – 01/12/2001)

Other studies

- *Nature and Biodiversity Finance,* Virtual training program (UNDP) (17/04/2026 – 23/4/2026)
- *Climate Finance Transparency* (Initiative for Climate Action Transparency -ICAT-UNOPS), Virtual Training Program (16/03/2026 – 19/03/2026)
- *Environmental and Social Risk Management System (ESRMS) (UNDP-GFLAC),* Virtual Training Program (27/04/2026 – 30/04/2026)
- *Implementation of Voluntary National Carbon Footprint Programs (PNVHC) (UNDP),* Virtual Training Program *(02/01/2024 - 04/01/2024)*
- *Structuring Renewable Energy Projects and Financial Instruments*, Latin American Energy Organization (OLADE), Virtual Training Program (14/05/2020 - 14/06/2020)
- *Conflict Negotiation and Resolution, National Technological University (UTN), Buenos Aires, Argentina (01/03/2019 – 30/11/2019)*
- *Diploma in Energy Economics and Energy Planning*, Professional Council of Mechanical and Electrical Engineering (COPIME), Buenos Aires, Argentina (01/03/2017-04/12/2017)

FELLOWSHIPS

- Fellowship awarded by the University of Buenos Aires to participate in the 2nd Annual International Conference of Emerging Industry (ICEI), Shenzhen, China (18-20/04/2015)
- Fellowship awarded by the Central Bank of Argentina to attend the 2nd Meeting of Nobel Laureates in Economic Sciences, Lindau, Germany (16-19/08/2006)

LANGUAGES

- Spanish: Native (C2)
- English: C2 (Proficient), Certificate of Proficiency in English (University of Cambridge)
- Portuguese: B2 (Upper Intermediate), regular stays in Brazil and continuous exposure

PROFESSIONAL EXPERIENCE IN CONSULTING AND RESEARCH (2003–2026)

- **El Salvador – Senior Climate Finance Advisor**. Participation in an ICAT project aimed at strengthening government capacities for the design and implementation of a climate finance MRV (Measurement, Reporting and Verification) system, in line with the Paris Agreement, the Modalities, Procedures and Guidelines (MPGs), and Biennial Transparency Reports (BTRs). Support in assessing the country's institutional needs and capacities for tracking and reporting climate finance received and required, reviewing and strengthening methodological approaches, formulating technical recommendations, and supporting the national team in the development of project outputs. Training for the national team on the application of the ICAT Climate Finance Transparency Guide (since 01/03/2026 – GHGMI).
- **IDB – Methodological Advice on Climate Finance Measurement in Lending Operations / Training on Climate Finance Tracking and Measurement for Bank Technical Teams.** Design and delivery of training for IDB technical staff on climate finance tracking and measurement, including the identification and tagging of climate finance amounts at project and component levels, using the MDB Common Principles. Provided methodological advice and applied the proposed methodology to specific lending operations, including the determination of climate finance eligibility and allocation in contexts of incomplete or uncertain information on portfolio composition, as well as the resolution of borderline classification cases (IDB/Ecohouse – since July 2026).
- **Argentina – Design of a National Regulatory Framework for Carbon Markets.** Economic, fiscal, and macroeconomic analysis of alternative scenarios for Argentina's participation in voluntary carbon markets, Article 6 mechanisms under the Paris Agreement, and CORSIA. Design of win-win mechanisms to align incentives between the National Government and provincial governments (IDB/Ministry of Economy/CICLA – since June 2026).
- **Argentina – Costing of Mitigation Policies and Measures for the Third Nationally Determined Contribution (NDC 3.0).** Development of a mitigation needs costing tool. Economic analysis of 25 mitigation measures (CAPEX and OPEX estimation). Identification of required means of implementation and financing options *(15/12/2025 – 26/03/2026 / UNDP Project).*
- **Latin America – Training on Energy and Climate Finance for Latin American Journalists.** Delivered training on the global energy finance landscape, energy

geopolitics, key climate finance concepts, and international climate finance outlook following COP30 in Belém (Climate Tracker, March 30th, 2026).

- **Uruguay – Analysis and Implications of a Regulatory Framework to Safeguard the Integrity of the Voluntary Carbon Market in Uruguay.** Development of proposals for a regulatory and operational framework for Uruguay's Voluntary Carbon Market, aligned with the Long-Term Low Emissions and Climate-Resilient Development Strategy (LTS). Analysis of the national project pipeline and the potential domestic and international supply and demand of carbon credits. Identification of synergies with other carbon pricing instruments and assessment of public policy intervention options (15/12/2025–28/02/2026 – Government of Uruguay – National Development Corporation -CND-).
- **Argentina – Climate Finance Tracking, Green Taxonomies and Climate Budget:** Identification and analysis of international best practices for tracking and reporting climate finance received by countries, in support of Biennial Transparency Report (BTR) requirements. Review of global climate taxonomies and budget tagging methodologies. Development of recommendations to develop a climate taxonomy in Argentina and improve the country's current tagging approach. Coordination with the Deputy Ministry of Environment *(*Deputy Ministry of Environment */ GEF Project - 01/03/2023 – 31/07/2025)*
- **Argentina - Towards the Development of an Environmental-Economic Accounting System (SEEA):** Benchmark analysis of international experiences. Estimation of pilot Environmental Accounts for Energy, Air Emissions, Forests, and Timber Resources for Argentina under the SEEA framework. Feasibility assessment for developing a Water Flow Account. Coordination with the National Institute of Statistics and Census (INDEC) (INDEC / World Bank Project –01/03/2023 – 01/10/2025)

- **Regional – Training for Central American journalists covering COP30 in Belém on climate finance in international negotiations:** Training focused on understanding the historical commitments of developed countries, key climate finance mechanisms, and the main debates leading up to COP30 — including the New Collective Quantified Goal (NCQG) and Loss and Damage — as well as the practical functioning of climate finance negotiations under the UNFCCC. The session combined technical content, contextual analysis, and tools to strengthen journalists' capacity to report on complex climate finance issues (Climate Tracker, 25/09/2025).
- **Argentina - Financing Forest and Biodiversity Conservation: Payments for Ecosystem Services (PES) and Other Innovative Financial Mechanisms to Mobilize Private Capital:** Conducted research combining a review of international experiences with the implementation of PES schemes, in-depth case studies (Costa Rica, Mexico, Brazil, and Ecuador), and interviews with key national and regional stakeholders. Identified lessons learned and developed policy recommendations tailored to the Argentine context, in line with the Kunming-Montreal Global Biodiversity Framework's objectives (*Fundar - 01/08/2024-01/10/2025*)

- **Argentina – Enhancing Access to Climate Adaptation Finance in Buenos Aires City:** Analysis of adaptation finance options for Buenos Aires City. Stakeholder engagement. Interviews with public officials, multilateral development banks and agencies and commercial banks. Report drafting and workshop facilitation. Coordination with the Environmental Protection Agency of Buenos Aires City Government *(*Buenos Aires City Government */ C40 Cities Finance Program and UrbanShift – 01/02/2024 – 30/11/2024)*
- **Uruguay - Design of a Voluntary Program for Organizational GHG Emissions Management:** Benchmarking of international experiences. Stakeholder interviews. Development of a voluntary program proposal for organizational GHG emissions management tailored to national circumstances. Workshop organization and facilitation. Analysis of enabling conditions and financial instruments. Coordination with the Ministry of Environment. *(Uruguay Government - 01/07/2023 – 30/10/2024)*
- **Argentina – European Union Green Deal: Trade and Economic Implications and Impacts on Public Policy and Private Action:** Analysis of the trade and economic implications for Argentina of the EU regulation on deforestation-free product imports, with a focus on its potential impacts on national public policy and private sector strategies. Stakeholder engagement *(Fundar / IDB Project -01/01/2023 – 01/11/2023)*
- **Argentina - Integration of Climate and Economic Information into National Statistical Systems: Harmonizing GHG Inventories with the System of Environmental-Economic Accounting (SEEA)**: Development of a GHG allocation scheme by ISIC sectors and households to support integration of GHG inventories with SEEA, enabling the development of an Air Emissions Account. Coordination with the Deputy Ministry of Environment *(*Deputy Ministry of Environment */ GEF Project - 01/01/2023 - 30/12/2023)*
- **Latin America - Financial and Governance Models for Urban Solid Waste Management:** Benchmark analysis of financial and governance models for urban solid waste management. Technical assessment, infrastructure options evaluation, and cost estimation for integrated solid waste management in Latin America. Coordination with the International Solid Waste Association (ISWA) *(ISWA Project "Financing Waste Management" - 01/04/2023 - 30/10/2023)*
- **Argentina - Capacity Building for Sustainable Natural Resource Regulation in Buenos Aires Province:** Analysis of socio-environmental conflicts arising from productive activities within the territory, including wetlands. Identification of key drivers and involved stakeholders. Development of technical recommendations to enhance regulatory frameworks and facilitate stakeholder engagement for improved environmental governance. Coordination with the Provincial Ministry of Environment *(Buenos Aires Province Government – 01/07/2022 - 30/11/2023)*
- **Argentina - Enabling Conditions for Investment in the Transition to a Low-Carbon Society in Latin America:** Technical contribution to Argentina's workstream on low-carbon pathways, barriers, and policy instruments. Facilitation of stakeholder dialogues in the Energy and Agriculture, Forestry and Other Land Use (AFOLU) sectors. Project

link: https://decarboost.com/paises/argentina/ *(Di Tella Foundation / Regional IKI-LAC Project - German Federal Ministry for the Environment (BMU) / 01/03/2020 – 30/11/2023)*

- **Argentina - Training on Carbon Pricing and Climate Finance:** Overview of carbon pricing instruments, including carbon taxes and the current state and trends of emissions trading systems worldwide. Covered both regulated and voluntary carbon markets, as well as potential integration opportunities with mechanisms under Article 6.4 of the Paris Agreement *(Bayer Argentina / 01/11/2022 – 30/04/2023)*
- **Chile - Midterm and Final Evaluation of the GCF Project "Climate Action and Solar Energy Development in the Tarapacá Region":** Financial and economic evaluation of a submitted Financing Proposal to the GCF. Assessment of the project's financial viability, cost-effectiveness, and potential socioeconomic impacts. Recommendations to strengthen project implementation and ensure alignment with GCF criteria and objectives *(CAF - 01/10/2021–30/11/2022)*
- **Argentina - Transition to a Healthy and Sustainable Food System in Latin America:** Contributed technical analysis and stakeholder engagement activities to support the transition toward a healthier and more sustainable food system in Argentina, including literature review, stakeholder mapping, interviews, and the design and coordination of stakeholder workshops *(IDRC Regional Project - Argentina, Brazil, and Chile – 01/03/2021–30/12/2022)*
- **Argentina - Green Productive Development Policies:** Analysis of the economic opportunities and challenges linked to the development of key low-carbon sectors in Argentina, including renewable energy, electromobility, and green hydrogen. Assessment of potential for value chain development and policy instruments to support a sustainable and inclusive green industrial transition *(Fundar - 01/01/2021-30/11/2021)*
- **Argentina - Long-Term Low-Carbon Development Strategy for the AFOLU Sector (AFOLU LTS 2050):** Coordinated and facilitated multi-stakeholder dialogue processes to support the development of Argentina's long-term low-carbon strategy for the Agriculture, Forestry and Other Land Use (AFOLU) sector. Engagement with public institutions, civil society, and private sector actors to ensure technical inputs, consensus-building, and alignment with national climate goals. Coordination with the Deputy Ministry of Environment *(Avina Foundation – 01/03/2019 – 30/11/2021)*
- **Argentina – Partnership for Market Readiness (PMR) Project - Carbon Tax Component Coordinator:** Coordinated inter-ministerial processes to strengthen the implementation of Argentina's existing carbon tax. Led the design, commissioning, and supervision of technical and economic studies assessing policy options and impacts of other carbon pricing instruments. Facilitated the organization and delivery of multi-stakeholder workshops to disseminate results and foster dialogue among public institutions, experts, and key economic actors. Coordination with the Deputy Ministry of Environment *(*Deputy Ministry of Environment */World Bank - 01/04/2019 – 30/11/2020)*

- **Latin America – Cost-Benefit Analysis for Climate Change Adaptation:** Analysis of the scope and limitations of Cost-Benefit Analysis for evaluating climate change adaptation measures in Latin America. Assessment of the applicability, advantages, and constraints of using cost-benefit analysis as a tool for evaluating adaptation measures in diverse socio-economic and climatic contexts across the region. Identification of methodological challenges and proposal of complementary approaches to inform more robust and inclusive decision-making. Policy brief drafting summarizing key findings and recommendations for policymakers and practitioners *(Avina Foundation - 01/04/2019 – 30/11/2019)*
- **Argentina - Buenos Aires Province Urban Waste Management Strategy:** Development of a comprehensive situational diagnosis assessing current urban solid waste management practices and challenges in Buenos Aires Province. Identification and evaluation of policy instruments to enhance integrated solid waste management systems. Preparation of a strategic proposal aimed at improving waste collection, treatment, recycling, and governance to support sustainable urban waste management (*Buenos Aires Province Government - 01/01/2019 – 30/12/2019)*
- **Honduras – Coordination and Preparation of a Concept Note for Submission to the Green Climate Fund (GCF) and the NAMA Facility on Sustainable Coffee Production**: Led the coordination and drafting of a Concept Note aimed at securing funding for sustainable coffee production initiatives in Honduras. Engaged with key stakeholders, including government agencies, local producers, and technical experts, to ensure alignment with GCF and NAMA Facility requirements. Conducted thorough research on project feasibility, climate impact mitigation, and adaptation potential. Facilitated multi-sectoral collaboration to strengthen the proposal's technical rigor and financial viability, supporting Honduras' climate resilience and sustainable agricultural development goals. Coordination with the Ministry of Environment and CABEI *(Honduras Government /CABEI – 1/03/2017– 30/11/2019)*
- **Uruguay – Preparation of a Funding Proposal for an Electric Mobility Program in Montevideo for submission to the Green Climate Fund (GCF):** Preparation and development of a comprehensive Funding Proposal aimed at advancing electric mobility initiatives in Montevideo. Coordination with governmental bodies, technical experts, and stakeholders to design a program that could promote sustainable urban transport, reduce GHG emissions, and support national climate goals. In-depth analysis of technical feasibility, cost-effectiveness, and potential environmental and social impacts of different technical alternatives. Ensured alignment with GCF criteria to maximize the proposal's competitiveness and readiness for funding approval *(CAF– 01/05/2018 – 30/11/2019)*
- **Latin America - Content Development on Climate Action and Finance for IDB Platforms: Green Finance LAC and Carbon Finance**: Developed comprehensive content and analytical materials focused on climate action and sustainable finance for the Inter-American Development Bank's (IDB) Green Finance LAC and Carbon Finance platforms. Provided technical inputs on emerging trends, policy frameworks, and financial instruments to support Latin America and the Caribbean's transition to low-

carbon and climate-resilient economies. Collaborated with cross-functional teams to ensure accurate, up-to-date, and accessible resources for policymakers, financial institutions, and other stakeholders engaged in carbon finance initiatives *(Di Tella Foundation / IDB - 01/03/2011 – 01/05/2019)*

- **Latin America - Review of Economic Instruments for Carbon Pricing:** Comprehensive global review of economic instruments for carbon pricing, including carbon taxes, emissions trading systems, and other market-based mechanisms. Analyzed design features, implementation challenges, and effectiveness worldwide to identify lessons applicable to the Latin America and Caribbean (LAC) region. Synthesized best practices to inform regional climate policy development and implementation strategies *(Di Tella Foundation / IDB - 01/03/2018 – 01/11/2018)*
- **Argentina - Economic Dimension of the 2030 Agenda: Incentives, Investment, and GHG Emissions Reduction within the Context of the SDGs:** Analyzed the economic aspects of Argentina's implementation of the 2030 Agenda, focusing on the design and effectiveness of incentives and investment strategies to drive greenhouse gas (GHG) emissions reduction. Provided policy recommendations to enhance synergies between economic development and environmental sustainability, fostering alignment with national and international commitments *(UNDP Project – 01/03/2018 – 30/11/2018)*
- **Argentina - Balancing Conservation with the Productive Potential of Native Forests in Argentina's Chaco Region – Project Coordinator:** Led a multidisciplinary project aimed at exploring the productive potential of native forests in the Chaco region while balancing sustainable use and conservation objectives. The main productive models, types of primary producers, and key actors in the forestry value chain were characterized in Salta, Santiago del Estero, Chaco, Formosa, San Luis, Catamarca, San Juan, and Santa Fe. The relationship between territory, actors, and products was quantified based on data from the 2008 Agricultural Census. Delivered policy recommendations to promote economic activities compatible with forest preservation, including the design of incentives to discourage deforestation. Coordination with the Ministry of Environment *(*Ministry of Environment – *01/03/2018 – 30/12/2018)*
- **Argentina - Development of Guidelines for Argentina's National Climate Adaptation Strategy:** Developed comprehensive guidelines to support the formulation of Argentina's National Climate Adaptation Strategy, emphasizing resilience-building in the health and water resources sectors. Identified priority adaptation measures to mitigate climate risks. Facilitated cross-sectoral coordination to align adaptation initiatives with national development objectives and international climate commitments *(Ministry of Environment / Di Tella Foundation – 01/03/2017 – 01/07/2017)*
- **Argentina - Trade and Climate Change: Challenges and Opportunities for Argentina in a Carbon-Constrained World – Project Coordinator:** Led the coordination of a comprehensive project analyzing the intersection of international trade and climate change policies, focusing on Argentina's strategic positioning in a global economy

increasingly constrained by carbon regulations. Assessed the risks and opportunities arising from potential carbon border adjustment mechanisms, sustainable trade practices, and low-carbon market access. Delivered actionable policy recommendations to enhance Argentina's competitiveness while aligning trade strategies with national climate goals *(Secretariat of Trade, Ministry of Production – 01/03/2017 – 30/12/2017)*

- **Colombia – Renewable Energy NAMA in Non-Interconnected Zones: Business Model Development and Financial Structuring:** Supported the design of a Nationally Appropriate Mitigation Action (NAMA) focused on promoting renewable energy deployment in Colombia's non-interconnected zones. Identified viable business models adapted to the technical and socio-economic characteristics of remote areas with limited grid access. Conducted financial structuring to attract public and private investment, integrating risk mitigation instruments and potential climate finance sources. Provided strategic recommendations to ensure the NAMA's sustainability, scalability, and alignment with national energy and climate goals *(Di Tella Foundation / UNEP Project - 01/03/2016 – 30/12/2016)*
- **Paraguay – Technical Assistance for Solar Energy Transition in Public Infrastructure in Asunción – Grant Proposal Development:** Provided technical assistance to the Municipal Government of Asunción in the design and development of an initiative to convert public building and green space lighting systems to solar energy. Activities included feasibility assessment and coordination with local authorities. The process culminated in the preparation and submission of a grant application to the European Union under its Thematic Programme *"Civil Society Organizations and Local Authorities (CSO-LA)" (Di Tella Foundation / UNEP Project – 01/03/2016 – 01/10/2016)*
- **Argentina – Urban Solid Waste NAMA: Concept Note Development for Submission to the Green Climate Fund (GCF):** Provided technical assistance for the design of a Nationally Appropriate Mitigation Action (NAMA) focused on integrated urban solid waste management in Argentina. The work involved the development of a Concept Note aligned with GCF investment criteria, including the identification of mitigation potential, institutional arrangements, and financing strategies *(Di Tella Foundation / CAF Project - 01/07/2015 – 01/11/2016)*
- **Latin America and the Caribbean – Towards a Set of Indicators for Greener Production: Capacities for Environmental Innovation:** Identification of key indicators for monitoring progress toward greener production systems in Latin America and the Caribbean. Conducted a review of environmental policy frameworks and innovation capacities, with a focus on measuring eco-innovation through proxies such as the number of environment-related patents filed in the region. The study provided policy-relevant insights to support evidence-based decision-making and strengthen the link between innovation, productivity, and environmental sustainability *(United Nations Economic Commission for Latin America and the Caribbean -ECLAC- 01/03/2016 – 30/11/2016)*

- **Argentina - Opportunity Cost Analysis of REDD+ Implementation - Project coordinator**. Led the coordination of a study assessing the opportunity costs of reducing emissions from deforestation and forest degradation (REDD+) in Argentina. The analysis aimed to inform the design of effective and equitable incentive schemes for forest conservation by quantifying the economic trade-offs between land-use alternatives and forest protection. Contributed to the integration of findings into national REDD+ readiness efforts. Coordination with the Ministry of Environment *(Di Tella Foundation / UNEP Project – 01/03/2015 – 30/11/2016)*
- **Argentina – Third National Communication to the UNFCCC: Economic Evaluation of Mitigation Options in the AFOLU and Industry sectors:** Conducted comprehensive economic assessments of GHG mitigation options across key sectors, including agriculture, forestry and other land uses (AFOLU) and industry sectors, as part of Argentina's Third National Communication to the United Nations Framework Convention on Climate Change (UNFCCC). Evaluated cost-effectiveness, potential emissions reductions, and co-benefits of various mitigation measures. Coordination with the Ministry of Environment *(Di Tella Foundation / Deputy Ministry of Environment – 01/03/2014 – 30/11/2015)*
- **Uruguay – Technical Assistance for the Development of a Project Identification Form (PIF) for GEF Submission: Mitigation Action in the Livestock Sector.** Provided technical support for the preparation of a Project Identification Form (PIF) aimed at securing funding from the Global Environment Facility (GEF) for a livestock sector mitigation initiative in Uruguay. Coordinated with national stakeholders, including government agencies and sector experts, to define project scope, mitigation potential, and financing strategy *(Di Tella Foundation / GEF - IDB Project – 01/10/2014 – 30/07/2015)*
- **Argentina – Environmental Public Expenditure Review:** Comprehensive review of environmental public expenditures in Argentina to assess the allocation, efficiency, and effectiveness of government spending on environmental policies and programs. Analyzed budgetary data across multiple sectors, identified funding gaps, and evaluated the alignment of expenditures with national environmental priorities and international commitments. Provided policy recommendations to improve financial management, promote transparency, and enhance the impact of public investments in environmental sustainability *(World Bank – 01/03/2015 – 30/11/2015)*
- **Argentina – Estimating Food Waste in Buenos Aires City:** Pilot study aimed at quantifying food waste in key sectors of Buenos Aires city, including supermarkets, markets, and restaurants. Conducted data collection and analysis to identify waste patterns and critical points in the supply chain. Provided insights to inform strategies for reducing food loss and promoting sustainable consumption practices in urban settings. Contributed to the study's methodological design *(Environmental Protection Agency of Buenos Aires City Government / CENIT – 01/03/2014 – 31/08/2015)*
- **Argentina – Greening Small and Medium Enterprises (SMEs): Impact on Competitiveness and Employment:** Analyzed how environmental sustainability

practices among SMEs affect their competitiveness and employment generation. Conducted data collection and analysis to evaluate environmental initiatives and their economic outcomes. Collaborated with stakeholders from the business sector and policy makers to provide evidence-based recommendations supporting green business development and sustainable economic growth *(IDRC Regional Project / CENIT – 01/03/2013 – 30/11/2014)*

- **Argentina – Small Hydropower NAMA Feasibility Study:** Conducted a comprehensive feasibility study for a Nationally Appropriate Mitigation Action (NAMA) focused on small hydropower development in Argentina. The study included an in-depth assessment of project sites in Salta province, analysis of mitigation potential, cost evaluation, co-benefit identification and the establishment of prioritization criteria for target areas in collaboration with the provincial government. Supported stakeholder engagement and provided strategic recommendations to guide implementation and promote low-carbon energy solutions *(Di Tella Foundation / IDB Project – 01/03/2013 – 01/12/2013)*
- **Panama – Facilitator of Introductory Workshop on NAMAs (Nationally Appropriate Mitigation Actions)**: Delivered an inductive workshop for officials of the National Environment Authority, providing foundational knowledge on NAMAs. The training focused on enhancing participants' understanding of mitigation strategies and their role within international climate frameworks *(Di Tella Foundation / UNEP Project – 29-30/10/2012)*
- **Costa Rica – Facilitator of Technical Workshop on Strengthening Capacities for NAMA Development**: Conducted a technical workshop titled "Financing NAMAs – Opportunities and Barriers" for the Ministry of Environment, Energy and Communications. The workshop addressed financing mechanisms, challenges, and opportunities for NAMA implementation to support national climate goals. Organized in collaboration with GIZ *(Di Tella Foundation / GIZ Project – 16-18/10/2012)*
- **Argentina and Paraguay – Development of Biofuels Sustainability Indicators:** Contributed to the design and assessment of sustainability indicators for the biofuels sector in Argentina and Paraguay. Evaluated environmental, social, and economic criteria to support policy frameworks aimed at promoting sustainable biofuel production and use. Facilitated stakeholder consultations and data analysis to ensure indicators aligned with regional priorities and international sustainability standards *(British Embassy in Argentina – 01/02/2012 – 30/10/2012)*
- **Latin America and the Caribbean – Analysis of Clean Development Mechanism (CDM) Projects:** Conducted a comprehensive analysis of Clean Development Mechanism (CDM) projects across Latin America and the Caribbean, assessing their implementation, emission reductions, and contribution to sustainable development. Evaluated barriers and opportunities within the region to inform future climate finance strategies. Provided recommendations to optimize CDM project design and integration with emerging carbon market mechanisms *(Di Tella Foundation / UNEP Project – 01/02/2012 – 30/11/2012)*

- **Argentina – Teleworking and GHG Emissions Reduction in Buenos Aires City:** Conducted an estimation of greenhouse gas (GHG) emissions reductions resulting from potential teleworking practices to be implemented by companies in Buenos Aires City. Analyzed data on commuting patterns, energy consumption, and telework adoption rates to quantify potential environmental benefits. Provided insights to support corporate sustainability initiatives and inform local policy discussions on sustainable work arrangements *(IDRC / CENIT – 01/03/2010 – 30/11/2012)*
- **Bolivia - Climate Economics Training for Bolivia's Negotiation Team:** Delivered specialized training sessions on Climate Change Economics tailored for Bolivia's national negotiation team involved in international climate change discussions. Covered key topics including economic assessment of mitigation and adaptation options, climate finance mechanisms, and cost-benefit analysis to strengthen negotiation capacity and inform strategic decision-making *(Di Tella Foundation / UNDP Project – 3-4/03/2011)*
- **Regional Capacity Building Trainer – Investment and Financial Flows for Climate Adaptation and Mitigation in Priority Sectors in Latin America and the Caribbean:** Facilitated capacity-building workshops across multiple countries—Costa Rica, Colombia, Dominican Republic, Ecuador, Paraguay, Chile, Honduras, Peru, and St. Lucia—focused on analyzing investment and financial flows required for climate adaptation and mitigation in nationally prioritized sectors. Engaged national participants, including government officials and sector experts, to strengthen technical skills and support evidence-based decision-making for climate finance planning and implementation *(Di Tella Foundation / UNDP Project – 01/03/2009 – 30/11/2011)*
- **Latin America and the Caribbean - Challenges and Fiscal Implications of Low-Carbon Infrastructure Investment:** Conducted a comprehensive analysis of the financial, policy, and fiscal challenges related to investing in low-carbon infrastructure across Latin America and the Caribbean countries. Evaluated the impact of fiscal constraints and public investment capacity on the feasibility and scalability of sustainable infrastructure projects. Provided strategic recommendations to overcome fiscal barriers and promote effective financing mechanisms aligned with regional climate and development goals *(UN ECLAC – 01/05/2010 – 30/10/2011)*
- **Participation in UNFCCC Technical Workshops on Climate Change Adaptation under the Nairobi Work Programme:** Engaged in technical workshops organized by the United Nations Framework Convention on Climate Change (UNFCCC) focused on the costs and benefits of adaptation options within the framework of the Nairobi Work Programme on Impacts, Vulnerability, and Adaptation to Climate Change. Contributed to knowledge exchange and capacity building on assessing adaptation measures, supporting international efforts to enhance resilience and inform policy development (Di Tella Foundation / UNFCCC, Madrid, 22-24/06/2010)
- **Argentina - Economic Analyst at Comunicaciones Sudamericanas S.A. (communications and advertising agency)**: Conducted political and economic context analysis, sectoral assessments, and supported mediation processes between government

institutions and private companies. Prepared strategic briefs for communicators and creative teams, translating complex information into clear and actionable messages (01/01/2001-30/10/2010).

- **Argentina - Secretariat for Environment and Sustainable Development - External Consultant:** Provided research support on key environmental economic assessments, including the valuation of recreational use impacts associated with Fray Bentos pulp mills construction. Also conducted analyses of carbon market trends and evaluated Clean Development Mechanism (CDM) projects with a focus on their contributions to sustainable development. Supported evidence-based policy recommendations to inform national environmental strategies (Secretariat for Environment and Sustainable Development - 01/03/2006 – 01/11/2006)
- **United Nations Economic Commission for Latin America and the Caribbean (ECLAC), Buenos Aires Office - Research Assistant:** Supported research projects focused on environmental management practices within Argentina's manufacturing sector and the financing of environmental policies. Conducted data analysis and literature reviews, and contributed to policy assessments aimed at enhancing sustainable industrial development and effective environmental financing mechanisms (ECLAC - 01/10/2003–31/12/2004)
- **Argentina – Environmental Policy and Management: Public and Private Expenditure and Financing:** Contributed to the analysis of environmental expenditure in Argentina, including updated estimates of public environmental spending across jurisdictions, assessment of economic instruments and preliminary review of private environmental expenditure. Identified budget execution challenges, limited enforcement of policy instruments, and the increasing role of external financing *(ECLAC – 01/03/2004-01/11/2004)*
- **Argentina – GHG Abatement and Sustainable Forestry Development: Synergies and Challenges:** Assessed the potential of the Clean Development Mechanism (CDM) to support sustainable forestry projects in Patagonia, Argentina. Conducted financial analysis of pine plantations in Neuquén Province, estimating carbon sequestration benefits and profitability under CDM. Identified key barriers—including environmental concerns, local distrust, and equity issues—and proposed policy recommendations to ensure environmental safeguards, promote small and medium-scale participation, and enhance early revenue generation through carbon credit sales *(IDB / ECLAC / CENIT – 01/02/2003 – 30/09/2003)*

TEACHING EXPERIENCE

- Professor of Environmental Economics, B.A. in Economics, School of Economic Sciences, University of Buenos Aires, Argentina, since 2016.
- Professor of Environmental Economics, Master's in Climate Change Law and Economics, Latin American Faculty of Social Sciences (FLACSO), Argentina, since 2019.

- Professor of Climate Change Economics, same Master's program (FLACSO), since 2016.
- Professor of Natural Resource Economics, same Master's program (FLACSO), since 2021.
- Lecturer, "Energy and Climate Change" Module, Diploma in Energy Economics and Planning, Argentine Institute of Energy (IAE), 2019–2024.
- Lecturer, "Climate Change Economics" Module, University Extension Diploma in Climate Change Management, National Defense University, Argentina, 2019.
- Lecturer, "Environmental Economics", Master's in Urban Economics, Universidad Torcuato Di Tella, Argentina, 2017–2018.
- Assistant Professor, Epistemology of Economics, B.A. in Economics, School of Economic Sciences, University of Buenos Aires, Argentina, 2002–2007.

GUEST LECTURER

- "Public Policies and Environmental Economics: The Argentine Case," Environmental Enforcement Policy Extension Course, Universidad Continental S.A.C., Lima, Peru, 2020–2021.
- "Global Climate Change," B.A. in Environmental Management, Universidad CAECE, Buenos Aires, 2017.
- "Global Public Goods Regulation," Master's in International Policy and Law, Universidad de San Andrés, Buenos Aires, 2016.
